Core Skills

- ★ Full Stack Web Development
- ★ Object-Oriented Programming (OOP)
- ★ RESTful API Integration
- ★ Authentication & Authorization
- ★ Debugging & Troubleshooting
- ★ Database Design & Management
- ★ Docker & Production Deployment
- ★ Problem Solving & Analytical Thinking
- ★ Self-Learning & Adaptability

Technical Skills

Frontend:

JavaScript, HTML5, CSS3, SCSS, Angular, React

Backend:

C#, .NET Core, Node.js, RESTful APIs

Databases:

MongoDB, Microsoft SQL Server (MSSQL)

DevOps & Tools:

Docker, Nginx, Git, Fly.io, Postman

Languages

Hebrew – Native

English – Professional Working Proficiency

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience designing, developing, and deploying scalable web applications in production environments. Strong background in frontend development using Angular and React, backend development with .NET Core and Node.js, and database management with MongoDB and SQL Server. Experienced in RESTful API integration, authentication and authorization, Docker-based deployments, and real-world debugging. Highly motivated, detail-oriented, and continuously learning new technologies.

Work Experience

Freelance & Personal Projects (Production-Level)

• **Stock Alert Bot (Live System):** Designed and developed a real-time market monitoring system that scans micro-cap stocks, detects sharp price movements, and sends automated alerts via Telegram. Integrated financial APIs, implemented WebSocket connections for live data streaming, and deployed a stable production service.

Technologies: Python, Finnhub API, WebSockets, Telegram Bot API

• **Freelance4U Platform:** Built a full-stack platform connecting freelancers and clients, including authentication, role-based access control, business card management, likes and comments, and admin dashboards. Implemented secure JWT authentication and OAuth login with MongoDB persistence.

Technologies: React, .NET 8, MongoDB, JWT, OAuth

• **Personal Portfolio Website (Live Production):** Designed and developed a modern, responsive portfolio website with animations and clean UX. Containerized the application using Docker and deployed it to Fly.io with Nginx, handling production configuration and routing.

Technologies: Angular, SCSS, Docker, Nginx, Fly.io

• **Game Center & Desktop Applications:** Developed multiple interactive desktop and web-based games with emphasis on clean architecture, reusable components, state management, and user experience.

Technologies: C#, WPF, JavaScript

Education

HackerU College – Full Stack Development Program (555 Hours)

September 2023 – February 2025

Intensive hands-on program covering frontend and backend development, databases, REST APIs, OOP, testing, and real-world project implementation.
