

# ROI LEVI

## Junior NOC Technician

Rehovot, Israel | [+972 52 705 1756](tel:+972527051756) | [roilevi2212@gmail.com](mailto:roilevi2212@gmail.com) | [github.com/roilevi01](https://github.com/roilevi01) | [linkedin.com/in/roi-levi01](https://linkedin.com/in/roi-levi01)

### PROFESSIONAL SUMMARY

Junior NOC Technician with hands-on experience in Linux systems, network monitoring, and incident troubleshooting through real-world simulations. Strong understanding of TCP/IP, DNS, ports, firewalls, and system services. Experienced in diagnosing service failures, connectivity issues, and performance bottlenecks. Fast learner, calm under pressure, fully available for 24/7 NOC shift work including nights and weekends.

### TECHNICAL SKILLS

Linux · Ubuntu · NOC · Network Monitoring · Incident Response · TCP/IP · DNS · DHCP · NAT · Routing · Firewall · SNMP · Troubleshooting · Python · Windows · Alert Triage · PRTG · Nagios · Zabbix · VirtualBox

**OS:** Linux (Ubuntu), Windows — troubleshooting, services, event logs

**Networking:** TCP/IP, DNS, DHCP, NAT, Routing, SNMP basics

**Monitoring:** Uptime monitoring, alert triage, incident detection, PRTG/Nagios/Zabbix (concepts)

**Commands:** ping, traceroute, ss, ip a, ufw, systemctl, journalctl, uptime, free, df

**Methodology:** Incident response: detection → triage → root cause → resolution → documentation

### EXPERIENCE

#### Linux NOC Home Lab | Self-Directed Practice 2024–2025

- Built and maintained a production-style Linux NOC lab using Ubuntu and VirtualBox, simulating real datacenter incidents.
- Simulated and resolved DNS failures, blocked ports, crashed services, and performance degradation within simulated SLA timeframes.
- Diagnosed connectivity issues using ping/traceroute; investigated failed services end-to-end with systemctl and journalctl.
- Monitored CPU, memory, and disk continuously; opened and secured services on custom ports including a Python server on port 8080.

#### Stock Alert Bot | Personal Project (Live Production)

- Built a real-time market monitoring system scanning microcap stocks and sending automated Telegram alerts — running stably in production for 6+ months.
- Technologies: Python, Finnhub API, WebSockets, Telegram Bot API.

### EDUCATION

#### Full Stack Development Program (555 hrs) — HackerU College | 2023–2025

Frontend, backend, APIs, SQL, security fundamentals, and system architecture.

### ADDITIONAL INFORMATION

**Languages:** Hebrew (Native) | English (Good technical level)

**Availability:** 24/7 NOC shifts including nights and weekends

**Strengths:** Fast troubleshooting, logical analysis, calm under pressure, incident response mindset
